Key Word Level

Key words are the important words in a sentence that carry the main message. Knowing the person's key word level helps you to know how many key words to use at one time.

Key Points

- We should be conscious about how much verbal information we are giving the person at one time

- Too many key words in a sentence can be confusing

- Knowing the person's key word level helps you to know how many key words to use at one time. It can also be useful to emphasise the key words

- A Speech and Language Therapist will be able to tell you the person's key word level understanding and how best to communicate with the person
